

Prendre le Contrôle de ma Sécurité

Il y a des problèmes qui me préoccupent et voici comment je compte utiliser les clés GPG pour en résoudre certains.

- 1 . People masquerading as myself and supplying modified, possibly harmful, copies of my work.
To guard against that I intend to digitally sign my work, or at least fingerprints of my work.
- 2 . People masquerading as myself and publishing posts, or opinions as though they are mine.
To guard against that I intend to digitally sign my posts.
- 3 . People masquerading as myself when corresponding with people who know me.
To guard against that I intend to digitally sign my email.
- 4 . Sharing a secret of some kind with other people, but using untrusted infrastructure to deliver that.
To guard against that I intend to encrypt such items using GPG encryption keys.
